Stay Curious

Inspire and nurture the natural curiosity of K-5 students. Video-based, hands-on core and mini lessons, driven by questions from real students, make science easy to teach, fun to learn, and memorable for all.
Make Learning Science Fun
Each video-based lesson begins with a mystery to solve. Embark upon an investigation with the first big clue, guided by questions that provoke thinking and discussion. Gather visual evidence to record and analyze. Solve the mystery with imaginative hands-on investigations that cultivate science and engineering practices and inspire a love of science.

Make Teaching Science Easy
Open-and-go lessons maximize instructional time. Integrate science into your classroom schedule with quick 5- and 15-minute mini lessons that require minimal planning time and content area expertise. Dive deeper with core NGSS-aligned lessons that extend learning with additional activities, assessments, and a further Anchor Layer.

Easier Yet!
Add Mystery Packs to make prepping even easier. These grade-level supply kits provide materials that support the hands-on activities in each unit, organized by lesson.

Make Science Memorable

Lessons are driven by questions from real children who are full of natural curiosity and wonder about the world around them. Each video tells a story through layers of questions and explanations with real-world phenomena, all of which paint a picture for students that is relatable, age-appropriate, inclusive, and leaves them with a profound new perspective.

Support Distance and Hybrid Learning

The online lessons are a natural fit for distance learning. Access from a collection of ready-to-use, no-prep, mini, and hands-on lessons that are ideal for remote and hybrid environments. Share lessons through Learning Management Systems (LMS), and stay connected to students, both in person or at a distance.
Reach All Learners through Relevant, Real-World Experiences

Discovery Education is committed to helping educators create equitable, engaging learning experiences. Through our dynamic K-12 platform, we bring the most exciting, authentic content, instructional strategies, and professional learning into the work you do every day -- keeping you connected to what matters most.

With Discovery Education, educators can expect:

1. High-quality content sourced and curated for educators and designed to engage all learners across grades, subjects, and topics of interest
2. Embedded instructional support and ready-to-use lessons paired with our content and resources
3. Subscription-based access to robust curriculum programs, like Mystery Science and Techbooks
4. Professional learning resources and tools, including access to a global community of educators to share ideas and best practices

All of these integrate into your classroom infrastructure to ensure safe, secure, and uninterrupted learning for every student, in any environment.
