LIFELONG LEARNING BEGINS WITH STRONG READING SKILLS

Fuel a Love For Reading With DreamBox Reading

Aligned to the science of reading, DreamBox Reading helps PreK-5 learners become proficient, lifelong, curious readers.

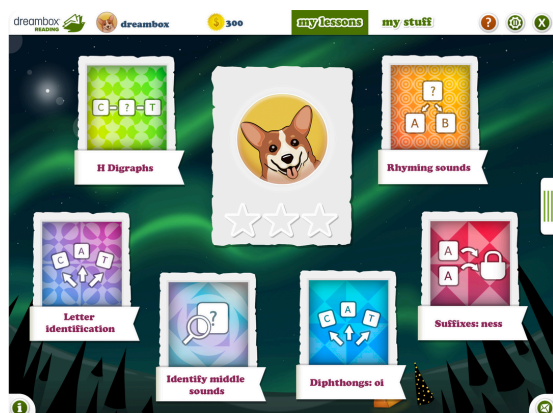

With real-time adaptivity and in-the-moment differentiation, every student receives personalized instruction to build foundational skills on the path toward proficiency. Systematic, explicit instruction and just-in-time scaffolding within a playful environment keeps students motivated as they build foundational reading skills.

Personalized Support for Every Reader, Without Adding to Teachers' Plates

DreamBox Reading is built on the DreamBox Intelligent Adaptive Learning Engine, which leverages cognitive science and research-based principles to dynamically adapt to each student's needs, providing the right scaffolds and support to build skills and confidence. It continuously analyzes student engagement, fine-tuning each learner's path to deliver their just-right next lesson.

This intelligent adaptivity allows teachers to personalize instruction at scale, giving valuable time back to focus on supporting every student.

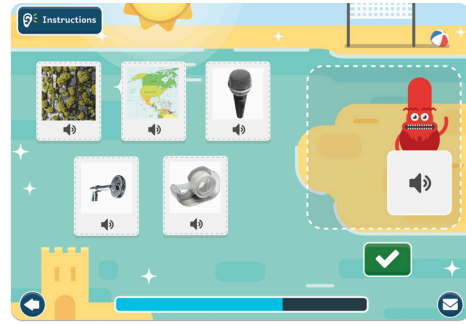

Where Effective Learning Feels Like Play

In a fun, dynamic environment, students take charge of their learning through interactive, age-appropriate lessons, self-selected activities, and game-inspired rewards.

All the while, they're building crucial skills like phonological awareness, phonics & word recognition, fluency, and vocabulary.

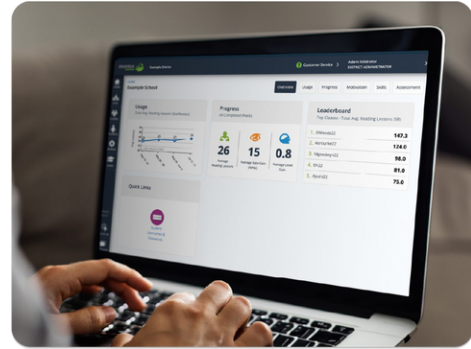

Supporting All Learners

DreamBox Reading supports all learners with embedded tools like read-aloud features and individualized scaffolding. No matter where they start, current language ability, or learning needs, with DreamBox Reading, students have the support to succeed.

Track, Achieve, and Celebrate Progress

Continuous formative assessment in DreamBox Reading provides valuable insights into student thinking. Teachers can access real-time data and reports to track student progress, identify areas of need, and tailor instruction effectively.
